PROFESSIONAL SUMMARY

Versatile technology professional bridging **Software Engineering**, **Cybersecurity**, and **IT Infrastructure**. Expert in building secure mobile apps with **Flutter**, developing custom Linux environments, and engineering IoT automation with **ESP32** & **Raspberry Pi**. Skilled in **LAN/WAN management**, network troubleshooting, and secure IT operations. Proven **Technical Trainer** — mentoring students in secure coding, Python automation, networking, and ethical hacking.

EXPERIENCE

Technical Skill Trainer

Jun 2025 – Dec 2025

Skill Dept., Sankalchand Patel Center of Excellence (SPU)

- Mentored **50+ students** building full-stack Flutter apps with secure auth & RBAC.
- Delivered training on **Python, IoT Fundamentals, Networking** & IT Support practices.
- **Secure Dev:** Designed curriculum identifying vulnerabilities in Python and Dart code.
- Led workshops on **system troubleshooting**, network config & cybersecurity practices.
- **Lab Mgmt:** Conducted **Kali Linux**, Wireshark & IoT security sessions.
- Guided students through full project lifecycle — ideation to deployment — with real-world focus.

PROJECTS

Sosent OS — Custom Security Distro

Custom Linux OS (Ubuntu/Kali base) for lightweight security testing — pre-configured pen-test tools, hardened kernel & streamlined interface for security professionals.

Linux Kernel · Bash Scripting · OS Customization · Kali Linux · Ubuntu

Home Automation System

IoT smart-home control system with real-time monitoring dashboard, mobile-responsive UI, and secure MQTT messaging between nodes.

ESP32 · Raspberry Pi · Python · MQTT · IoT

Advanced Automation System

Scalable multi-node IoT platform with relay-based device management, sensor data logging, and OTA firmware updates.

ESP8266 · NodeMCU · Python · Flask · Relay Modules · OTA Updates
